This guide is a discussion of the roles and responsibilities faced by owners, architects, and contractors on sustainable design and construction projects. AIA Document D503™ -2013 includes a discussion of environmental product ratings, certification systems and jurisdictional requirements that may apply to sustainable projects.

## **Project delivery resources - AIA**

Modular construction used to have a bad rap of limiting architects' design creativity. But new design and construction approaches are changing its reputation. When done thoughtfully—through early collaboration with fabricators—architects can create unique designs that address a range of client needs.
