Access 2010: Creating Reports - GCFGlobal.org

Access 2010 includes table-level triggers and stored procedures built into the ACE data engine. Thus a Client-server database system is not a requirement for using stored procedures or table triggers with Access 2010. Tables, queries, forms, reports and macros can now be developed specifically for web based applications in Access 2010.

Microsoft Access - Wikipedia

Beginning in the Access 2010 release, Access contains many new macro actions that enable you to build more powerful macros than you can build by using earlier versions of Access. For example, you can now create and use global temporary variables by using macro actions, and you can handle errors more gracefully by using new error-handling macro actions.
