Although ATVs are for riding trails and racing and UTVs are typically used for work, there are different types of ATVs and UTVs that are designed and manufactured for different uses, which include: racing, hunting, farming, recreation, military, emergency services, and more. As you can see, there's an off-road ATV/UTV for just about anything.

ATVs and UTVs: Everything you need to know | Life Lanes

Most basic ATVs have a thumb throttle, not a twist throttle like dirt bikes, and it's located on the right side of the handlebars. The left handlebar will probably have the electric start, headlight controller, a kill switch, and a lever that controls the front brake (where the clutch would be on a dirt bike).

Common ATV Controls | WI | Offroad Ed.com™

ATVs uses either disc brakes, drum brakes, or a combination of these two systems. When the rider

File Type PDF Atvs Basic Learning About Atvs Basic Learner Series A Childrens Book About Atv Action Over 46 Photos Of Atvs

of an ATV with disc brakes activates the hand lever or foot pedal, brake fluid is being squeezed through the brake lines, activating the brake piston. This, in turn, pushes the brake pad against the brake disk or brake drum, creating friction.

How do ATV brakes work? Learn the basics.

Kids ATV Training Video Basic Tips for Adults to 4 Wheelers

ATVs typically are single-rider vehicles that are powered by a gas or electric engine. Engines are described by their size, measured in cubic centimeters. The more ccs, the more power. Adult models typically range from 250 cc to 1,000 cc [source: Tranby].

Introduction to Hunting ATVs | HowStuffWorks

If you are buying for a child, consider getting a kid-sized ATV. These models often come with other features to make learning for a young learner a little easier, such as throttle limiters and automatic transmission. Beyond that, you'll probably be looking at buying factors that would be true for any level of ATV experience.
