Get Support for Your Air Conditioner If your air conditioner has a QR code on the model/serial tag, similar to the one in the image shown here, just scan it with your smart device and be taken directly to support for your specific model.

## **Support for GE Air Conditioners**

A common cause for window air conditioners to not blow air is a restricted air filter. If the air filter becomes dirty or clogged, there will be little or no air flow over the evaporator coils. This causes them to become too cold and frost or ice can start to build up, resulting in no air being circulated into the room.
