Projects - ATmega32 AVR

Electronics projects based on ATmega32 microcontroller of AVR series. These ATmega32 projects and tutorials are explained with the help of schematics, source codes and videos. GPS module (uBlox Neo 6M) Interfacing with AVR Microcontroller Atmega16/32.

ATmega32 Microcontroller Projects - Circuit Digest

AVR is a family of microcontrollers developed by Atmel beginning in 1996. These are modified Harvard architecture 8-bit RISC single-chip microcontrollers. ATmega series are one of the types of AVR microcontrollers with features like 4-256 KB program memory,
