What is SOA (Service-Oriented Architecture)? | IBM

Service-oriented architecture (SOA) is a style of software design where services are provided to the other components by application components, through a communication protocol over a network. A SOA service is a discrete unit of functionality that can be accessed remotely and acted upon and updated independently, such as retrieving a credit card statement online.

Service-oriented architecture - Wikipedia

A key thesis of "Service Oriented Architecture for Dummies" is that successful transition to a service oriented architecture (SOA) requires the cooperation of business managers and I.T. people. SOA is not simply the latest and greatest approach to building distributed systems; SOA also re-conceives how business and I.T. should work in partnership to construct their software architecture.
